

Refinc Erasmus+ Project: Recent Activities in Promoting Refugee Participation in European Schools

N E W S L E T T E R

RECENT ACTIVITIES

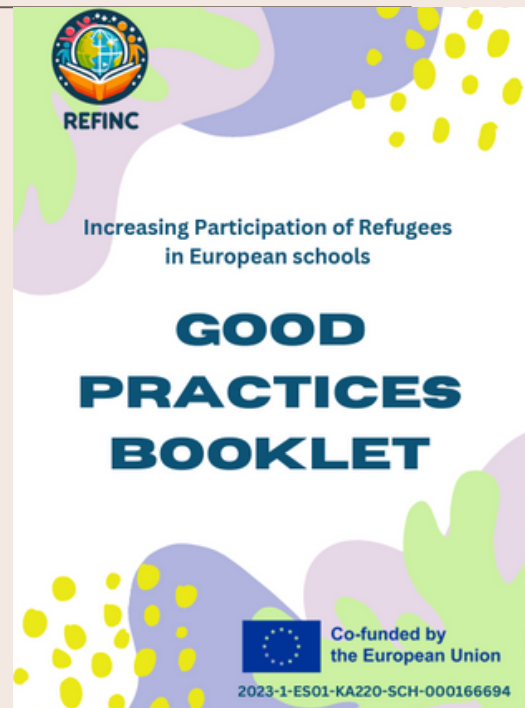

Introduction: Welcome to the latest newsletter from the Refinc project, part of the Erasmus+ initiative. Refinc aims to enhance the integration and participation of refugees within educational systems across Europe by collaborating with schools and local communities. Through this project, we strive to support teachers, schools, and communities in creating inclusive environments for all students.

Teacher Training Program:

Recently, the project team prepared a training program for teachers and educational staff in schools. This training program aimed to empower educators to apply inclusive teaching methods that help overcome language and cultural barriers. Participants will gain new insights into techniques that facilitate the engagement of refugee students in daily classroom activities.

Focus group:

We asked experts in training programs and activities to check make comments and give useful feedback to the developed training program which will be used in the schools in the pilot testing phase of the project. After collecting all feedback from partners we prepared a consolidated report and improved the training program based on feedback from focus groups.

Booklet of good practices:

This booklet of 30 Good Practices which we prepared as a project result, offers a foundation for educators who wish to enhance their approach to inclusion and make a positive impact on the lives of refugee students. Teachers play a vital role in helping these students feel included, supported, and empowered to succeed academically and personally.

Conclusion:

The Refinc project continues to work on implementing activities that foster inclusion and provide equal educational opportunities for all students. We look forward to further progress and shared successes. Thank you for being part of this journey and supporting our mission!
